wellbeing-in-education

If you checked YES to one of the above, when did this child become part of the family?
When a psychologist is providing professional services to a child who is a minor, the psychologist must obtain informed consent from the minor's parent/guardian. Generally, a psychologist is not required to obtain informed consent from both of the parents since either parent normally has the right to consent to services for the child However, if the parents are separated or divorced, the psychologist must make appropriate inquiries to ensure that the adult requesting services is the child's legal parent/guardian. It is recommended by the College of Albert Psychologists that psychologists obtain relevant court documentation prior to commencing services.
As a result of this requirement, the Clinic will request to view custody/access documentation pertaining to chil clients. Also, should a custodial parent be unable/unwilling to participate in the service delivery process, they will b asked to provide a written (email) statement to that effect.
Has any family member had difficulty with any mental health issues (anxiety, depression, etc.)?
What is the primary language(s) spoken at home?
