*Emphasizing the inherent strengths
of all learners and striving to develop
optimal outcomes for children, youth,
families, educators, communities, and
society.*

DOCTORAL PROGRAM

EDUCATIONAL STUDIES IN SCHOOL & APPLIED CHILD PSYCHOLOGY

Why School Psychology?

As advocates for children, school psychologists focus their commitment to children’s well-being by developing a robust child and family-centered service delivery model that responds directly to need in the most appropriate manner – a model that reaches out to children and families where they live, learn, and play through evidence-based prevention, direct and indirect intervention and remediation, and community promotion and development.

Our Mission

Our goal is to prepare school psychologists to be contributors to and effective collaborators in enhancing learning and mental health outcomes for all individuals within a wide variety of settings. Graduates of our program are positioned to serve as educational leaders in the effective application of educational and psychological principles to the learning environment at both the individual and systems levels.

Students are provided with opportunities for direct training and rich hands-on learning within the

classroom and clinical and school environments. Using a scientist practitioner model of training, we cultivate graduates who are theoretically and scientifically-informed critical thinkers and who understand and respect the diversity of human characteristics and conditions in order to demonstrate excellence as providers of high-quality, evidence-based prevention, assessment, intervention, and research services.

Why Choose Werklund’s School & Applied Child Psychology Program?

- Access to award-winning and profession-leading faculty with diverse research interests and strong research and practice connections with various community agencies and schools (e.g., CanLearn, Society for the Treatment of Autism, Renfrew Educational Services) and other research institutions at UCalgary (e.g., Hotchkiss Brain Institute, The Owerko Centre).
- Opportunity to complete practicum hours in both our award winning **Integrated Services in Education** clinic and in high-quality local school environments.
- Forward-thinking faculty and institution, offering the first online school psychology program in Canada and an innovative Indigenous training partnership.
- Comprehensive graduate training options that allow students to complete an integrated, sequential MSc-PhD route.

Why Choose Werklund’s Doctoral School & Applied Child Psychology Program?

Our doctoral (PhD) program builds upon the skills developed in our MSc program and enhances the research and clinical acumen of our graduates. Specifically, graduates of the SACP PhD program will be provided with:

- Advanced training in consultation, school- and clinical-based interventions, neuropsychological assessment and intervention, program evaluation, and statistics.
- Competitive funding with students receiving \$18,000 in funding for four years and strong mentorship and support in applying for additional national, provincial, and local scholarships.
- Focus on training that equips graduates for work in diverse professional settings, including research, applied, or administrative settings.

Program Requirements

The PhD in School & Applied Child Psychology requires a minimum of four years to complete, with the first three years of full-time residency on-campus. Students complete 11 doctoral-level courses, including school and clinical-based interventions, advanced neuropsychological assessment and intervention, consultation, advanced research statistics, clinical supervision program development and evaluation, advanced seminar in school psychology, and four (200-hour) practica. Applicants to our PhD program who have not completed the MSc program in SACP at the University of Calgary are required to have

equivalent background knowledge and experience.

Throughout the program, students work with their research supervisor and supervisory committee to complete their research. Candidacy examination is completed within 28 months of starting the program. Successful completion of this examination attests to the student’s readiness to undertake the dissertation, which preferably will be completed by Year 3 in the program. A twelve-month full time internship is required in Year 4.

Our Students

Typically:

1 male to 10 females

23-40 years old (at time of admission)

1% self-identify as diverse

Our Graduates

The majority of our graduates are employed in schools, but others are employed in community-based settings, mental health facilities, private practice, or academic positions. A number of our graduates continue to teach part-time and/or are actively involved in research.

100% of our graduates are registered or provisional psychologists, with almost 50% of our PhD students becoming provisional or registered psychologists while in program.

FACULTY MEMBERS

SCHOOL & APPLIED CHILD PSYCHOLOGY

Jac Andrews, PhD, RPsyc – Professor & Chair
cognitive-behavioural, ecological

Emma Climie, PhD, RPsyc – Associate Professor & Director of Training and Internships
developmental, biopsychosocial

Adam McCrimmon, PhD, RPsyc – Associate Professor & Director of Practicum
developmental, cognitive

Erica Makarenko, PsyD, RPsyc – Senior Instructor & Director of ISE
cognitive-behavioural

Michelle Drefs, PhD, RPsyc – Associate Professor
developmental, biopsychosocial

Meadow Schroeder, PhD, RPsyc – Associate Professor
developmental, biopsychosocial

Hanna Duffy, PhD, RPsyc – Instructor
developmental, biopsychosocial

Carly McMorris, PhD, RPsyc – Assistant Professor
developmental, biopsychosocial, cognitive-behavioural

David Nordstokke, PhD – Associate Professor
biopsychosocial, behavioural, ecological

Kelly Schwartz, PhD, RPsyc – Associate Professor
developmental, ecological, family systems

Gabrielle Wilcox, PsyD, RPsyc – Associate Professor
cognitive-behavioural
