EDUCATIONAL PSYCHOLOGY (EDPS) ONLINE

EDPS 614
Ethics in Professional Psychology
Delivery: Online

Ethical, legal, and professional knowledge to inform practice in professional psychology.

EDPS 650
Family and Social Bases of Behaviour
Delivery: Online

Using developmental systems theory and current research, the focus will be on understanding how significant ecological systems foster both positive and negative psychosocial development in children and adolescents in applied health and school settings.

EDPS 652
Academic and Language Assessment
Delivery: Online

Course provides a broad understanding of the standards that guide assessment practices through an examination of assessment of academic areas and language skills.

EDPS 690
School-based Intervention and Consultation
Delivery: Online

An exploration of school systems, evidence-based interventions, and theories of consultation.

EDPS 693.15
Interventions for Working with Middle and Senior High School Students With Mental Health Concerns
Delivery: Online

Course focuses on the complex difficulties that adolescents in the middle and senior high school years (ages 12+) with mental health concerns deal with, including peer pressure, drug/alcohol use, educational demands, and societal issues.

EDPS 693.34 Planning for Social, Emotional, Behavioural Development, and Long-Term Success of Students with Learning Disabilities
Delivery: Online

This course extends the learning in Planning for Academic Success of Students with Learning Disabilities by learning about interventions, planning, and design for social, emotional, behavioural development, and long-term success for students with Learning Disabilities.
